PROFESSIONAL SUMMARY

Front-End-Focused Full-Stack Engineer with 7+ years of experience designing and developing scalable web applications using **React, Next.js, Vue.js, Node.js, and TypeScript**. Skilled in building **modular architectures** such as **Micro-Frontends** and integrating **REST and GraphQL APIs**, with hands-on experience in **Azure DevOps, CI/CD pipelines, Docker, and cloud deployment (AWS & Azure)**. Adept at **translating business requirements into maintainable, high-performance solutions** aligned with **modern web standards and SOLID principles**. Currently expanding full-stack proficiency through **Node.js, Express, and database technologies** to strengthen **solution design and architectural capabilities**. Passionate about **architecture-driven development, developer experience, and mentoring peers** toward **efficient, scalable, and robust frontend engineering practices**.

EXPERIENCE

Accenture, 07/2025 – Present | Philippines

Packaged App Development Senior Analyst

- Performing frontend migration tasks, including template mapping, content migration, and headless architecture implementation.
- Gaining hands-on experience with modern frontend workflows and migration best practices.
- Collaborating with teams to ensure smooth content transitions and maintain application integrity.

Yondu, Inc., Software Engineer 11/2021 – 07/2025 | Philippines

- Developed and deployed Micro-Frontend architectures utilizing Vue.js, React.js, and Next.js as proof of concept.
- Conducted research on single codebase methodologies for React Native Web as a proof of concept to enhance cross-platform development.
- Led the integration of Micro-Frontend practices within premier JavaScript frameworks, improving modularity and scalability.
- Worked on creating UI for a ChatGPT-like web app and an AI-based skill assessment platform using Next.js.
- Explored WebRTC for real-time communication and video streaming as a proof of concept.
- Researched Builder.io , a Figma-based code generator, to explore its potential for accelerating frontend development.
- Engineered robust CI/CD pipelines tailored for Micro-Frontend deployment to optimize workflow automation.

- Currently improving expertise in Node.js, Express, MongoDB, and SQL to expand full-stack capabilities.

Aiah, Front-End Software Engineer 10/2020 – 10/2021 | Philippines

- Spearheaded the maintenance of legacy front-end applications, ensuring robust performance and reliability.
- Established a scalable Nuxt.js framework for upcoming projects, optimizing for future development efficiency.

Total Integrated Resources, Software Engineer 10/2018 – 09/2020 | Philippines

- Engineered robust Nuxt.js/Vue.js web applications, optimizing user experience and interface.
- Successfully deployed cutting-edge Progressive Web Apps (PWAs) for enhanced mobile performance.
- Streamlined application deployment cycles, significantly improving release efficiency.
- Constructed and maintained Continuous Integration/Continuous Deployment (CI/CD) pipelines, ensuring rapid and reliable code delivery.

Technostore Inc, Web Developer 03/2018 – 08/2018 | Philippines

- Expert in designing, building, and maintaining dynamic websites.
- Proficient in cross-browser and multi-environment website testing.
- Skilled in converting PSD designs to responsive HTML layouts.
- Experienced in conducting performance benchmarking tests for web applications.

EDUCATION

Bachelor of Science in Information Technology, 2014 – 2017
AMA University

Associate's degree in Computer Technology, 2012 – 2014
ACLC College Sorsogon

SKILLS

Frontend Development: JavaScript, TypeScript, React.js, Next.js, Vue.js, Nuxt.js, Vuex, Zustand, HTML5, CSS3, SCSS, Tailwind CSS, Chart.js, Auth.js, NPM package development

Backend Development: Node.js, Express.js, MongoDB, Postgres, Prisma, Sequelize MS SQL, NPM package creation & publishing

Cloud & DevOps: Microsoft Azure, Azure DevOps, Kubernetes, Docker, CI/CD Pipelines, ARM Templates, Git

Architecture & Design: Microservices, Micro-Frontend Architecture, Solution Design, REST APIs, GraphQL

Cloud Platforms: AWS (IAM, S3, CloudWatch, CloudFront) | Azure (Virtual Machines, Azure Load Balancer)

Delivery & Process: Agile, Scrum, Waterfall, Sprint Planning

CERTIFICATES

People Leadership Credential - Level 1

Accenture

Aug 2025

Lean Six Sigma Yellow Belt Certification

MF Treinamentos

Jun 2025

107542121

Lean Six Sigma White Belt Certification

MF Treinamentos

Jun 2025

107541993

PROJECTS

Rest-Shape [🔗](#),

10/2025

JavaScript NPM package for API response shaping

- Started development in 10/2025; currently building features to reshape REST API responses using GraphQL-style queries.
- Implemented support for directives, default values, filters, transformations, fragments, and nested objects/arrays.
- Enables developers to pick, transform, and compute API responses declaratively, improving API data handling efficiency.
- Published and maintained on NPM, with full TypeScript support.

Tweakr [🔗](#),

10/2025

Lightweight JavaScript/TypeScript utility library

- Initiated in 10/2025; actively developing a modular, tree-shakable library providing functional, async, array, number, object, string, and browser helpers.
- Designed for TypeScript-ready usage, improving type safety and developer productivity.
- Published as an NPM package and maintained actively.
